TRIPwire, the Technical Resource for Incident Prevention (https://tripwire.dhs.gov), is the Department of Homeland Security’s 24/7 online, collaborative information-sharing network for bomb squad, first responders, military personnel, government officials, intelligence analysts, and security professionals to increase awareness of evolving terrorist improvised explosive device (IED) tactics, techniques, and procedures, as well as incident lessons learned and counter-IED preparedness information. Developed and maintained by the Department’s Office for Bombing Prevention, the system combines expert analyses and reports with relevant documents, images, and videos gathered directly from terrorist sources to help users anticipate, identify, and prevent IED incidents.

IED Threat Information Sharing - Bombing Prevention at your fingertips

- Utilize the “What’s New” feature for coverage and analysis of the latest domestic and international IED-specific events and incidents
- Leverage the wealth of explosives-related information and analysis to identify explosive hazards, including IED components, and potential terrorist tactics in high-risk operations
- Access critical counter-IED information such as common site vulnerabilities, potential threat indicators, protective measures, bombing prevention training, planning, and policy guidance to enhance domestic preparedness
- Review expert-validated profiles and cutting-edge terrorist IED videos to recognize operational tactics and prioritize and improve protective measures or training scenarios
- Use the Domestic IED Incident Map and Reports to understand risks in your community

“TRIPwire is exactly the kind of support local law enforcement needs on the Federal level to combat and to interdict terrorism.”

Chief William Bratton, Los Angeles Police Department
